SUMMARY

10+ years building accessible, scalable front-end and Drupal experiences across agency, enterprise, and government clients. Deep expertise in HTML5, CSS3, and JavaScript applied to UI interactions and accessibility, Drupal 7–11, and component-driven development, with a UX/UI design background that brings both technical precision and design sensibility to the work. Known for delivering Section 508 and WCAG 2.1 compliant solutions and driving project success through clean code, open-source contribution, and strong cross-team collaboration. Currently seeking a front-end role where my ability to bridge design and development, combined with a commitment to accessibility and code quality, adds real value to the team.

SKILLS

Languages: HTML5 • CSS3 • SASS/LESS • JavaScript • Twig • PHP (functional knowledge)

Frameworks & Libraries: jQuery • Bootstrap • Zurb Foundation • NextJS • GraphQL • Storybook • Tailwind

CMS & Tools: Drupal 7–11 • WordPress • Drush • Composer • Pantheon

DevOps & Version Control: Git • CI/CD Pipelines • Agile / Scrum • Lando • DDEV

Accessibility & Standards: Section 508 • WCAG 2.1 • ARIA • Responsive Design • Mobile-First • Cross-Browser Testing • Remediation

Design: Figma • Affinity • Adobe Creative Suite • UX/UI Design Principles

EXPERIENCE

Front-End Developer

Aten Design Group | May 2022 - March 2026

- Front-end development on 10+ Drupal and WordPress projects, delivering scalable, accessible, and performant web experiences for a diverse range of clients.
- Architected and built themeable components using Single Directory Components (SDC), improving codebase scalability, maintainability, and design system consistency across multiple projects.
- Implemented JavaScript and jQuery solutions to enhance accessibility, animations, and user interactions, aligning with WCAG 2.1 standards and modern front-end best practices.
- Audited and remediated 6+ existing sites to meet Section 508 and WCAG 2.1 accessibility standards, ensuring inclusive experiences across a diverse user base.
- Contributed to open-source Drupal projects including Mercury Editor and Prototype Starterkit, collaborating with the broader Drupal community to improve reusable tooling.
- Maintained and updated Drupal core and contributed modules across 10+ client sites, ensuring security, stability, and compatibility with the latest platform releases.
- Participated in CI/CD workflows using automated pipelines for continuous integration and deployment, streamlining code review, testing, and release processes.
- Updated designs across client projects, ensuring visual consistency and brand alignment, while maintaining documentation to support team collaboration and long-term maintainability.
- Collaborated as part of a multidisciplinary team of developers, designers, project managers, and strategists, while engaging directly with clients to gather requirements and ensure project goals were met.

Front-End Developer & Web Designer

RehabCreative | May 2018 - May 2022

- Led full-cycle website development projects from initial build through deployment, prioritizing responsive design, cross-browser compatibility, and performance.
- Translated UX and UI designs into clean, browser-tested front-end code, assessing technical feasibility and maintaining brand standards throughout.
- Collaborated closely with developers and clients to gather requirements, meet project goals, and deliver new features for existing client sites.
- Built mobile-first responsive sites using HTML5, CSS3, JavaScript, Bootstrap, and Foundation.

UI/UX Design Strategist, Senior Designer & Front-End Developer

Newmedia | May 2013 - May 2018

- Led UI/UX design for responsive web and web application projects, translating stakeholder needs into user-centered solutions that enhanced overall user experience.
- Designed and developed responsive web applications in Agile/Scrum workflows, collaborating closely with development teams to deliver brand-consistent, mobile-first solutions for PaaS/SaaS, B2B, and B2C clients.
- Built and maintained fully interactive HTML5/CSS3 prototypes and production websites using JavaScript, jQuery, and responsive frameworks (Bootstrap, Foundation).
- Developed and maintained in-browser wireframing and design tools, along with style guides and interaction stylesheets, enabling developers to implement consistent design across projects.
- Leveraged Git for version control and collaborated with development teams using Agile project management practices.
- Led and mentored a 10-person design team, running weekly critiques and establishing creative best practices across all client touch points.
- Built and maintained Drupal websites using HTML5, CSS3/SASS, and jQuery, delivering responsive, cross-browser-compatible solutions.
- Collaborated with diverse clients to develop web solutions aligned with business requirements, strengthening brand presence and user engagement.
- Developed content and information architecture strategies, improving site usability and maintainability.

Web Designer & Drupal Themer

Variant Studios | May 2010 - May 2013

- Designed and built brand-consistent, responsive websites focusing on visual impact, usability, and content architecture.
- Developed and maintained front-end code using HTML5, CSS3/SASS, and jQuery, delivering cross-browser-compatible solutions.
- Defined content structure and information architecture to improve site usability and maintainability.
